

Architectural Intern – Los Angeles, CA

The Stantec downtown Los Angeles office leads the transit market in transportation related facility planning and design. We focus on providing transformational design solutions that exceed our clients' aspirations through interdisciplinary collaboration. Our building practice keeps people at the heart of our design efforts. Buildings that make up our built environment shape and inform where and how we choose to live, learn, play, and conduct business. We are passionate about creating sustainable, meaningful projects that create tremendous value for the clients, users, and the public. Our awards are a testament to our commitment to great design, the human experience, and the environment we live in.

Our passion is the driver behind these results – come join us!

Your Opportunity

We are looking for Architectural Interns who share our interest in projects with an emphasis on transit, infrastructure, and civic architecture. Our LA office specializes in work throughout the US and Canada, designing and delivering multimodal transit centers, Operations & Maintenance facilities, light rail stations, bike and pedestrian pathways. We provide a unique opportunity to work within a multidisciplinary office, connecting our architects and engineers from all over the World.

Your Key Responsibilities and Opportunities

- Serve as a team member on various project phases including: conceptual design, programming, space planning, SD, DD, and CDs.
- Use Revit/CAD/BIM software for producing drawings and details.
- Address coordination items under the supervision of senior staff.
- Assist in developing project specifications.
- Understand QA/QC processes and how to make needed corrections and/or revisions under the supervision of senior staff.
- Keep up-to-date with technological developments such as new codes, new design concepts, computer applications, drafting methods, etc.
- Serve as point of contact team members.
- Opportunities to coordinate and maintain a professional relationship with clients, contractors, inspectors, agencies, and consultants.
- Learning opportunities to develop and manage schedule, budget and scope of services on projects.
- Participate in client and consultant meetings.
- Contact product vendors and manufacturers.

Your Capabilities and Credentials

- Revit and MS Office experience required.
- Bluebeam software experience is a plus.
- Licensure in progress.
- LEED AP, LEED GA or LEED project experience preferred.
- Basic understanding of building engineering system concepts.
- Basic knowledgeable with codes, agency and standards research techniques.
- Basic knowledge and understanding of federal, agency and other required standards and requirements.
- Capable of generating design alternatives and solutions.

Education and Experience

Minimum 3 years of experience. Graduate of an accredited architectural school with professional experience in an architecture office.
