

## Intermediate Designer

### About Us

For 65 years, Steinberg Hart has been shaping environments and creating inspiring places through an idea driven, results-oriented approach to design. The firm's team of architects, designers, planners and sustainability experts share the belief that design can create profound and unexpected connections between people and place. With a focus in education, residential, urban mixed-use, hospitality, civic, and commercial office projects, the full-service architecture firm creates environments that sculpt space to shape lives in subtle and empowering ways. From the foundation established in 1953 by Silicon Valley architecture pioneer Goodwin Steinberg, FAIA, and through Rob Steinberg's years of leadership, Steinberg Hart has built a progressive portfolio of award-winning projects spanning multiple continents and diverse sectors.

**Overview:** Steinberg Hart is seeking an Intermediate Designer who will be responsible, under general guidance, for the development of various design, technical and production elements, or entire sections of projects, and managing own time consistent with the project schedule.

### Responsibilities

- Involvement in all phases of the design process including programming, schematic design, design development, construction documents and construction administration.
- Produce presentation graphics, 3D renderings, feasibility studies, schematic designs, documents, working drawings and details.
- Other responsibilities include: product research, field visits, and producing base drawings.
- Under general direction, interface with consultants and external resources.

### Requirements

- Minimum three (3) years of experience in technical and design production.
- Solid manual and computer visualization skills and able to develop functional site plans, elevations and sections from programmatic or prototype information.
- Experience in schematic design, design development, construction documentation, construction administration, and review.
- Understands structural, mechanical, and electrical systems. Has solid understanding of the composition requirements of working drawings.
- Understands sustainable practices and industry standards.
- Excellent graphic, verbal and written communication skills, as well as excellent organizational and time management skills
- Applies working knowledge of industry practices and a proven track record of progressively more complex and diverse assignments.
- Solid judgment, based on precedent and policy, in the development of a recommended course of action.
- Coordination with team and communication with team leadership.
- A degree in Architecture, related field or equivalent experience required.
- Proficiency in relevant computer software:
  - Building Information Modeling: Revit 2016 or later
  - Rendering: 3D Studio Max, Maxwell Render, Twinmotion, or Enscape
  - Modeling: SketchUp or Rhino

- AutoCAD 2016 or later
- Microsoft Office

**Desired Attributes**

- Commitment to design innovation and excellence
- Independent, self-directed and self-motivated
- Highly organized
- Values and personality compatible with firm's culture

**Pay/Benefits**

Steinberg Hart offers full benefits including: medical, dental, life, STD & LTD, 401k with a match, vacation, sick, and holiday. Pay commensurate with experience. Steinberg Hart is an equal opportunity employer.
