

130 years in business has proven the meaning of our corporate vision “Creating meaningful, Lasting Architecture.”

MacLachlan, Cornelius & Filoni (MCF) Architects, located in downtown Pittsburgh, serves a diverse list of clients in Healthcare, Higher Education, Performing Arts, Commercial and Liturgical markets. Our firm’s culture has allowed us the privilege of developing lasting relationships with clients, while providing them with the highest level of service and design.

Our firm’s leadership is genuine and experienced with a comprehensive knowledge of creative design and implementation. Our long-term staff is dedicated and highly skilled which has assisted us with our growth. 75% of our technical staff are registered Architects. Our Director of Healthcare Architecture (Jeanmarie Zimmerman) relocated to Pittsburgh from the Los Angeles area and leads our design team.

We are currently seeking a Healthcare Project Architect to join our firm and be part of a Healthcare studio who specialize in designing healing environments. 100 years of combined dedicated Healthcare experience leads our team. At the core of our work is the humanity of patients, public and caregivers who serve in our healthcare designs.

Studio Principals and leaders combined have designed hospitals, ambulatory care, MOB and specialize in Master Planning regionally throughout western Pennsylvania and surrounding states. Our vision is that thoughtful design can provide wellness spaces which improve patient experiences and outcomes.

Our sincere goal is to share our knowledge with the candidate and exceed our client’s expectations as well as providing future development opportunities.

I am proud to work for MCF and would be happy to discuss our staff’s working environment, the friendships you would make, and our town’s affordability and amenities.

#### **ROLE AND RESPONSIBILITIES:**

- Contribute creative ideas with a team for projects.
- Work closely with Design Principal to lead project from Conceptual phase through Construction.
- Consult with client to determine functional and spatial requirements.
