

TECHNICAL DESIGNER / SALES ENGINEER

WE ARE a thriving, well-established technical sales rep. firm specializing in high-end acoustical products and finishes. We have been in business for 12 years and are looking to add to our team in our LOS ANGELES office. We offer a flexible work environment and the option to work from home (after an initial training period), an energetic start-up vibe, and long-term potential for profit sharing.

YOU ARE entrepreneurial and excited by the opportunity to join a small and growing firm. You enjoy helping specifiers develop technical construction details, appreciate the building and fabrication process, are process- and detail-oriented, and are interested in architectural acoustics, architectural design, and issues of constructability.

TASKS INCLUDE:

- Creating shop drawings for acoustically isolated wall/floor/ceiling assemblies and coordinating with our structural engineer as required.
- Providing technical detailing support to architects, acoustical consultants, and contractors.
- Visiting project sites to review construction progress and compliance with shop drawings.
- Preparing detailed estimates to contractors in accordance with architectural and structural drawings, specifications, and other documentation to prepare quantity take-offs for acoustically isolated floors and ceilings, sound-rated doors and windows, acoustical enclosures and barriers, and acoustical finishes.
- Supporting our promotion of architectural-acoustical products to architects and acoustical consultants.
- Tracking and managing orders from quote to sale to installation.

SKILLS INCLUDE:

- Experience with construction, and construction detailing or shop/fabrication drawing.
- Proficient in AutoCad LT, Bluebeam Revu, and Microsoft Office and willing to learn Quickbooks software.
- Excellent written and verbal communication and interpersonal skills.
- Professional, collaborative, self-motivated, and willing to grow with the company.
- Exceptional attention to detail.
- Creative problem solving.

EDUCATION:

B.Arch, B.Eng, or B.Const.Mgmt. preferred.

EXPERIENCE:

Minimum two to five years with construction, architecture, or engineering firm.

COMPENSATION:

Compensation is competitive and commensurate with experience. Benefits include medical insurance, retirement plan (after waiting period), paid vacation and holidays, and an incentive/bonus program.
