

Degenkolb Engineers is looking for an **Associate Project Manager** to join our team in **Los Angeles**. This individual will leverage their experience and PM fundamentals to play a critical role in the successful delivery of engineering and construction projects in the California healthcare sector.

Who we are:

Founded in 1940, Degenkolb Engineers' practice reflects more than seven decades of commitment to expertise, client service, and life-long learning. Our employees are passionate about working in collaborative environments helping our healthcare, higher education, advanced technology, construction, and federal clients achieve outstanding project results. We deliver customized structural solutions that meet every project need whether those needs are meeting stringent codes, meeting a bottom line, sticking to a hard construction schedule, or developing a structural system that creates a landmark.

Our firm is highly collaborative and filled with experts who are united by a commitment to professional development, industry involvement, taking pride in ownership, and respect for our personal lives. We listen to each other and value feedback from all perspectives, and we believe that these traits have helped to create a truly great place to grow our careers.

Careers at Degenkolb are ideal for high-performing individuals who thrive in an environment where they'll work on multiple interesting projects, while investing time in mentoring junior technical staff to continue our culture of excellence.

What you'll do:

- Work with the Project Manager to support the Principal in Charge to successfully complete each project.
- Facilitate exchange of information and coordination between subconsultants as necessary in support of the project(s).
- Prepare for and attend project meetings as required and assist in generation of agendas, minutes, and other means of effective communication.
- Assist in maintaining project schedule, budget, and scope. Identify issues that may impact quality, scope, schedule, and budget.
- Provide additional support as deemed appropriate by Principal in Charge or Project Manager.

Qualifications:

Required:

1. BS degree in Civil Engineering, Structural Engineering, Architecture, Construction Management or related field.
2. Four years of engineering, architecture, or construction management experience in a relevant Project Coordinator or Job Captain role, or two years of Project Management experience.
3. At least one year of project management and/or construction administration experience with healthcare renovation and/or retrofit projects under OSHPD jurisdiction.

Desired/Preferred:

1. Record of stable work experience.
2. Outstanding prioritization, communication and interpersonal skills.
3. Relevant professional licensure or construction-related certification/qualification such as CAPM or LEED.

Additional Information

Degenkolb offers a very competitive salary (based on experience and qualifications) along with:

- Company-sponsored plans in medical, dental, vision, and life insurance, as well as commuter benefits.
- Generous Paid Parental Leave program.
- 401(k) and Profit Sharing.
- Encouragement and financial support for professional development and professional activities.
- Truly flexible work environment.
- Paid company holidays and generous paid time off (PTO).
