Job Title: BIM Specialist / Manager

Firm Name: CO Architects

City: Los Angeles, CA

Salary Range: Commensurate with experience

Benefits: CO Architects is an equal opportunity employer and offers a full range of competitive benefits to employees including: healthcare coverage; a 401K plan and profit sharing; vacation, holiday and sick leave time; a medical flexible spending account; and participation in the firm’s performance-based bonus program. CO Architects also offers a firm-sponsored education program to encourage professional training and development.

Job Description: CO Architects is looking for a BIM Specialist / Manager to join our interdisciplinary practice. We are nationally recognized specialists in architectural programming, planning and design for the science & technology, higher education, K-12, healthcare and civic sectors. The role is to develop BIM workflows and set standards for Revit and other design technology platforms in the office. This role is primarily focused on project work, but will also contribute to office-wide design technology efforts. This role will report directly to the Director of Digital Design and Technology.

- Manage overall BIM workflows with owners, consultants and contractors.
- Help to develop methods for improved BIM quality management.
- Assist in streamlining the transfer of design intent to documentation for construction and facility management.
- Provide leadership and guidance on various Revit-based projects including:
  - Project setup and coordination with project stakeholders
  - Coordination of BIM standards
  - Custom Revit families and data for documentation and downstream use
  - Alignment of BIM Execution Plan

Job Requirements:

- Prior experience in a BIM support / management role.
- High level proficiency in the setup and management of Revit-based projects.
- Ability to multi-task and manage multiple projects concurrently.
- Minimum of an Associate Degree required.
- Strong verbal and written communication skills.

Additional responsibilities might include:

- Providing guidance on the development of parametric models in Rhino/Grasshopper, Revit/Dynamo and/or CATIA 3DExperience.
- Help in the development of analytical tools for data visualization.
- Assist with the experiential visualization of architectural designs in Virtual and Augmented Reality.
