

Project Manager/Designer

Office Overview:

McClellan Design is a boutique design firm based in the city of Orange, California specializing in high end contemporary residences worldwide. Our projects reflect our interest in the tradition of modernism that is prevalent in Southern California. We are located in the hub of many great restaurants and within walking distance to the Metrolink train system in downtown Orange. Our office is set up in a studio like atmosphere with opportunities to work on all levels of projects from schematic design to construction administration. It is a fast-paced environment where we work together as a team in order to handle multiple projects at once.

Role Overview:

We currently have an expanding workload and are looking for an individual that is knowledgeable in residential architecture with a strong work ethic, capable of understanding and handling multiple projects with minimum supervision. The applicant will be required to execute their job responsibilities while taking initiative to find ways to improve work flows and efficiency within the office.
