

The award-winning team at GGLO, a collaborative design firm, seeks a **Project Architect** with **Multifamily** focus for our **Boise** office.

About GGLO

GGLO is a design practice for architecture, urban design, landscape, and interior, founded in 1986. GGLO has built a strong reputation for transformative and contextually sensitive design. With offices in Seattle, Los Angeles and Boise, we work as a single, collaborative studio focused on connecting people through beauty and innovation.

About the Role

The Project Architect (PA) is a key technical member in the success and delivery of our project work. GGLO Architects have the technical responsibility for executing the design concept of a project through construction documents. For this, the PA must understand and keep an eye on the big picture, while simultaneously being entrenched in the details. The success of a project, starting from concept through construction relies on the clarity, completeness, accuracy, and overall quality of our project documents. The PA must coordinate the many aspects of a project in order to achieve the desired result- great design delivered through great document sets.

Essential Duties and Responsibilities

- Understand the implications and timing of overall project schedule (developed by the PM) with ownership of successful administration.
- Communicate effectively with Technical Lead, Project Manager, Project Designer, and other internal stake holders
- Demonstrate thorough understanding of BIM Execution Plan in order to support BIM Lead
- Competently manage time and priorities and communicate them to the project team
- Demonstrate understanding of the larger context and impact of design
- Understand code and regulations governing the industry and ability to perform research
- Effectively advance and explore design opportunities offered by each project
- Assist PM in communication to the client, contractor, and other internal and external stakeholders
- Review consultant drawings for technical accuracy
- Effectively perform work requiring independent judgment and problem solving
- Demonstrate the utilization of clear and open process for solving problems
- Possess knowledge of the phases of the design process and construction
- Possess knowledge of materials and detailing
- Act as coach and mentor for other architects and production staff
- Develop a complete understanding of GGLO quality management process and procedures

Requirements

- Licensed Architect
- 8+ years experience in a professional design office setting with a focus in multifamily projects
- Demonstrated proficiency with Revit, Adobe Creative Suite, Microsoft Office Suite and other design delivery tools
- Understanding of all aspects and phases of the architectural production process, major building systems, detailing, and constructability
- Ability to understand best practices associated with technical implications of design decisions
- Experienced in the production of quality construction documents and directing other production staff and consultant teams in the preparation of those documents
- Current authorization to work in the United States

Why GGLO?
