Minarik Architecture is looking for passionate designers to join our team.

Our Bozeman, MT office has multiple positions available for architects/designers with 3–8 years of experience to join in all phases of our design-driven projects.

MA is design studio committed to projects that connect people with place, forming both a response and relationship with their surroundings. Our work is anchored by understanding there is responsibility that comes with adding or altering space within a landscape, and how this change will impact the narrative of a place for future generations.

As a team, we value communication, design innovation, technical curiosity and the rigor necessary to take a project from concept through construction.

You will:
- work closely and collaboratively within a project team that extends beyond the in-house team to consultants, contractors, clients, agencies, and constituents
- work on a variety of project scales and types
- work in a variety of media to create presentations, drawings, and models that focus on communication of design intent
- see projects through from conception through construction

Together we have:
- a strong work ethic
- a belief that architecture and design can make the world better
- desire to continue to learn and grow
- exceptional design sense with strong graphic and technical skill.
- cooperative problem solving
- great communication and organizational skills
- interest and passion for all scales of architectural design
- an understanding of construction materials and methods

While we work in a variety of media to develop designs, all documentation is done in Revit and proficiency in Revit is required.

We provide:
- a rewarding workplace with interesting projects and great teammates
- a competitive salary
- health insurance benefits
- simple IRA savings plan
- paid holidays and vacation
- trail to the mountains from the door of the office

For consideration, please submit cover letter, resume, and work samples in PDF format to:
