10 YR ARCHITECTURAL DESIGNER

Preen is searching for a great team lead.

This is an opportunity to step into a powerful, long-term growth position.

We are a small, scaling powerhouse on the tipping point of a new vertical.

90% of what we do is in hospitality.

We started designing for chefs 17 years ago and we do a lot of restaurants.

We also do hotels, wineries, dispensaries and occasionally, an architectural home.

Our growth is towards a deeper wellness sector, innovating models for intentional, emerging communities...and in creating sacred space.

We are an all hands on deck office.

We are a tight team and we work closely together.

We operate in the space between an architecture and an interiors office...so expect to be immersed in things having to do with both.

- We are looking for someone with a sound architecture background who knows the process of getting a TI project complete.
- Someone who can manage timelines and production.
- An inspiring and fun teammate.
- Someone who loves design and who is also willing to step into our creative process.
- Someone who has been around the block and is ready to immerse themselves in a team and build together.

Must have a degree in Architecture, Masters preferred.

Must be great with Revit. (Archicad experience is ok.)

Must have a car or have a plan to get a car.

Must be legal to work in the US.

Kindly email your cover letter, resume and portfolio to alexis@preeninc.com.
