

Are you passionate about complex projects? Technology and sustainability integrated design? The power of design and the social role of architecture across a broad spectrum of project types? [Join us!](#)

WHAT WE OFFER

STUDIOS is world-renowned for unique and creative design; for master planning, architecture, and interior design work that enhances innovation and enlivens community for our clients.

Our collaborative spirit leads to transformative design. Our process [engages the full team in the design](#), based upon our belief that the best ideas can come from everywhere.

In our Los Angeles studio, you will gain [significant exposure and experience](#) working on a variety of projects with our agile team. We enjoy a [strong studio culture](#), a community of friends and colleagues who are passionate about creating world-class design. Mentorship, professional growth, and [continual learning opportunities](#) are emphasized in the fabric of who we are at STUDIOS. We offer competitive salary, excellent benefits, and support for IDP, ARE, LEED, and continuing education.

STUDIOS Architecture is fully committed to the concept and practice of [equal opportunity and affirmative action](#) in all aspects of employment.

WHAT YOU BRING

- > Bachelor's degree in Architecture or Interior Design
- > Strong portfolio of professional and academic projects
- > 1-7 years of experience working in an architectural or interior design firm
- > Experience with highly complex project types: large commercial office, mixed-use, civic, academic, and/or cultural projects
- > Strong communication skills and ability to collaborate internally with team and externally with clients, consultants, contractors, and vendors
- > Experience in all phases of architectural services from Concept Design to Schematic Design through Construction Documentation and Construction Administration
- > Proactive approach to design with excellent analytical, problem-solving, and presentation skills
- > Design and documentation experience using Revit.
- > Software Experience with Revit, Rhino, Autocad, Grasshopper, and Sketch-up.
