Founded in 1919, KJ has always looked to the future. With a talented team of professionals and a culture of continuous improvement, we deliver exceptional engineering and environmental consulting services today, with a focus on innovation and sustainability. Using new advanced analytics, technology, and tools, KJ improves designs, reduces risk, and finds better ways to deliver projects. KJ is at the forefront of developing sustainable solutions for clients, including green infrastructure design, strategies to reduce energy use and environmental impacts, and award-winning water reuse projects. We are known for our dedication to industry-leading client service and tailored solutions.

Kennedy Jenks Consultants is seeking an Architectural Designer with 3-5 years of experience to join our team. This role will focus on supporting water and wastewater infrastructure projects, providing architectural design assistance and construction support for treatment facilities, pump stations, and other critical infrastructure.

### **Key Responsibilities:**

- Assist in the design and development of architectural components for water and wastewater treatment facilities, pump stations, and industrial buildings.
- Provide construction support, including reviewing submittals, responding to RFIs, and conducting site visits.
- Collaborate with multidisciplinary teams, including civil, structural, mechanical, process and electrical engineers, to ensure seamless project integration.
- Develop architectural drawings, 3D models, and technical specifications using Revit and AutoCAD.
- Ensure compliance with building codes, accessibility standards, and client-specific requirements.
- Participate in client meetings, design reviews, and project coordination efforts.

**Qualifications:**

- Actively seeking licensure as a Registered Architect.
- 3-5 years of professional experience in architectural design and construction support, preferably within the water/wastewater or industrial sector.
- Proficiency in Revit, AutoCAD, and Bluebeam.
- Strong understanding of building codes, construction methods, and sustainable design practices.
- Experience working in engineering consulting or infrastructure projects is a plus.
- Excellent communication and collaboration skills, with the ability to manage multiple projects and deadlines.

At Kennedy Jenks, we are committed to providing innovative solutions for critical water infrastructure. If you are passionate about applying architectural expertise to essential projects, we encourage you to apply.

**The salary range** for this position is anticipated to be \$75,000 - \$110,000, and will vary based upon education, experience, qualifications, skills, licensure/certifications, seniority, and geographic location.
