

PROJECT ARCHITECT

We are seeking a Project Architect/ Project Manager to be involved with all aspects and phases of the design and production of custom modern residential, civic, and commercial design projects. Depending on the candidate, this position may be located in either our Malibu or Bainbridge Island (Seattle) studio.

About YOU: You have six to ten years of practical experience and are passionate about doing good work. You may or may not know exactly how to detail a specific system (hey, we are all still learning!) but you know how to research and find the right answer. You are capable of managing and motivating your own efforts as well as the efforts of others on your project team. Not only do you know what a quality set of documents looks like (and can share examples), you take pride and personal responsibility in the preparation and coordination required to realize them. You want to be a part of a small office where we all have a voice and we all can learn from one-another. You are either licensed or on well into the path to licensure. You already live in the area and want to collaborate here in the office with the rest of us.

About US: We are a small firm, doing residential, civic, and commercial projects in the Puget Sound and Southern California. We believe that the best architects operate as generalists and, as we cautiously grow, we are looking for someone who shares in our interest in all aspects of a project's realization to create work that inspires us.

Software/ Tools: We are a BIM/ Mac-based office. We use Archicad (although we have found that Revit experience makes for an easy transition) with Enscape and BIM-X. We also use Adobe Creative Suite, and MS Office products.

We are hoping to add your creativity, drive, professionalism, and a shared desire to continue learning here to our studio culture! In addition to your resume/ portfolio, please provide a brief cover letter to tell us a bit more about yourself and what it is like to work with you.

COMPENSATION AND BENEFITS PACKAGE:

Benefit package includes health and vision, 401K with employer match, generous PTO in addition to paid holidays, and a professional development program.

POSTED SALARY RANGE: \$80,000 to \$95,000 (annually)

Contact Information: Please email resume and a pdf (9 Mb max) with examples of your work or a link to adin@studiobacket.com. Please no phone calls. Of particular interest are examples of clear construction documents that you are proud of, illustration of your design thought-processes and associated diagramming. Thank you.
