

Job Title: Project Architect/Project Manager

Firm Name: Mackenzie

Location: Sacramento, California

Firm Profile:

Mackenzie's vibrant and welcoming culture embodies the collaborative spirit we've nurtured together for nearly seventy years. Our rich diversity and collective journeys of growth and transformation fill us with immense pride. This diverse perspective adds value to our projects, strengthens our teams, and enhances our communities.

As Mackenzie continues to thrive, several defining themes have emerged.

- We remain steadfastly committed to one another and to bringing the visions of our clients and communities to life.
- We wholeheartedly embrace the essential business stratagem of fostering equity within our organization and the communities we serve.
- We are deeply devoted to creating environmentally sound and livable places for future generations.

These commitments and shared ideals form the foundation of our daily work. They shape our culture of friendship and resilience, which allows Mackenzie to meet challenges with pride, fueled by creativity and passion.

Salary Range: \$100,000 to \$131,000. Salary commensurate with experience.

Job Description:

We appreciate your interest in Mackenzie!

Due to our recent expansion into the Sacramento area, we are looking for a highly talented Project Architect/Project Manager with experience across many project types such as Industrial, Retail, Advanced Technology, and Commercial/Workplace sectors.

The ideal candidate excels in technical coordination, possess strong design and production skills, and has inherent abilities to manage their own work efforts along with the project discipline team, and consultants.

Mackenzie is especially interested in candidates with strong professional connections and experience in the Sacramento area or have a strong ability to integrate themselves into the design and construction community of the region.

Key Responsibilities:

- Lead and develop projects from conceptual planning to coordination of project development through design, agency approvals, and construction.
- Collaborate with engineering consultant teams on projects and integrate mechanical, electrical, and process systems.
- Perform code analysis and research on technical aspects of a project.
- Plan, organize, and coordinate with the project team.
- Interact with clients and agency staff to attain design and permit approvals for the vision of the project and technical solutions.
- Oversight and mentoring junior staff on the various architectural and technical related efforts.

Job Requirements:

- 10 to 20 years of architectural experience with relevant project types.
- An architectural license is required
- Proficiency in Revit and BIM workflows.
- Ability to work independently on projects through design development, construction documents, and contract administration phases.
- Technical experience and understanding, especially with mechanical, electrical, and process systems.
- Experience with fast-track, advanced-tech, or engineering-led projects is a plus.
- Communication skills when working with clients, firm staff, and agency personnel.
- Experience with Deltek Vantagepoint is a plus.
- InDesign experience is a plus.
