We're not your average design collaborative, so we're not looking for your average Senior Job Captain either. We define ourselves as a collaborative because this is the trait that lies at the heart of how we work... Collaboratively.

We are *thinkers* and *doers*.

We are *visionary* and *grounded*.

We are *design-focused* and *results-oriented*.

We don't believe *design happens in a vacuum*, nor do we believe in big reveals.

We believe *the best solutions are co-authored*, and that design is an iterative process.

We like dialogue and debate, and we *believe everyone has a voice* because there are never any bad ideas.

We put the customers (animals and robots included) at the heart of everything we create, which means:

- every design is created from a place of relentless curiosity
- we dive deep to inhabit the personas of our end users
- we pressure test our concepts against one metric above all others: have we exceeded expectations of those who experience the spaces we create?

We're also champions for diversity as a design collaborative, drawing from all experience levels and cultural backgrounds within our team of "Bergies" – intentionally staffing project teams inclusively to represent the diverse perspectives of the world around us.

We tend to do our best work with those that feel the same way... Are you that somebody?

We are looking for a technically savvy architect based in **Los Angeles** who exudes positivity, approaches work with a collaborative style, with a special passion for work in commercial and high-tech industrial workplace projects for our national clients.

We design for industry-leading clients with brands that drive the future of the thriving workplace to meet the needs of every type of worker. Are you ready to ride with us? **Join our team located in Los Angeles.**

We invite you to take a test drive and check us out at www.bergmeyer.com

Qualifications:

- Professional Degree in Architecture
- On the path to Licensure and LEED AP status a plus
- Advanced proficiency with Revit
- Proficiency with Adobe Creative Suite and Microsoft Office
- 5-7 years of relevant experience Recent experience with industrial spaces and industrial workplace projects a plus.
- Advanced construction documentation skills.

Essential Skills and Responsibilities:

- Ability to graphically communicate an idea quickly, backed by strong technical capabilities regarding building construction and technologies.
- Participation in the full design process from conceptual design through Construction Administration as a member of a project team.
- Experience with fast-paced, technical projects.
- Strong organizational skills.
- Conduct site surveys and full code and accessibility reviews. Solid experience with existing conditions is necessary.
- Prepare design development and construction document packages with project teams, consultants, contractors, and vendors.
- Oversee drawing and project coordination with consultants and vendors.

Travel is required.

***The base salary will be estimated to be between \$65,000 - \$95,000 contingent on relevant experience plus profit sharing and benefits.*

At Bergmeyer, our culture of collaboration welcomes good ideas from wherever they come. We create projects that thrive on inquiry and investigation, and encourage staff to cultivate new skills, take on additional responsibility, and offer meaningful contributions. We invest in our people with competitive compensation and benefits packages and by contributing to professional development expenses. We value those who are fun and interesting to work with and who make a positive impact on our projects and our workplace.
